Accessibility Features of the Conventional and Para Transit Buses, Routes and Services

August 2019

The accessibility for Ontarians disability act has established the integrated accessibility regulation 119/11 and section 34 of the Transportation standard stipulates that the city shall make available to the public current information on accessibility equipment and features of their transportation vehicles, routes and services. The following is provided to meet this requirement.

Services

upon request, any information about either the conventional or para Transit system that is made available to the public will be provided in an accessible format that meets the requirements of the person requesting the information. Both the conventional and para Transit systems operate Monday to Friday from 6:45 a.m. to 6:15 p.m. and Monday to Friday 6 – 9 p.m. (1 Bus) and Saturdays from 8:45 a.m. to 6:15 p.m. There is no service on Sunday or statutory holidays.

Fare parity exists between both systems.

The conventional Transit system provides upon request verbal pre-boarding announcements to ensure that passengers are provided with route/destination information prior to entering the bus.

The conventional Transit system provides verbal on-board announcements of all stops that the bus is approaching to assist passengers in arriving to their destination.

Routes

Para Transit - service is provided to registered passengers by pre-booked ride from accessible exterior building entrance to accessible exterior building entrance within the municipal boundary and to St. Lawrence lodge and Sherwood Park Manor.

Conventional Transit – service is provided to and from designated bus stops within the municipal boundary and to St. Lawrence lodge and Sherwood Park Manor.

Accessibility Features on Buses

Para Transit buses are equipped with lifting devices to load and unload passengers that are unable to board or exit the bus using the bus steps. Each bus has 4 allocated mobility aid spaces (wheelchair or scooter) with restraint systems and 8 seats.

Conventional Transit – service is provided by buses that are equipped with ramps and/or lifting devices to load and unload passengers that are unable to board or exit the bus using the bus steps. Each bus has 2 allocated mobility aid spaces (wheelchair or scooter) with restraint systems.

Both the conventional and the para Transit buses are equipped with high colour-contrasted grab bars, handholds, handrails or stanchions where appropriate to support independent and safe boarding, debarking, on-board circulation, seating and standing assistance and for persons with disabilities. The buses have floors that produce a minimal glare and are slip resistant. Stop requests and emergency response controls are located throughout the bus at appropriate locations and there is adequate lighting at all passenger access doors to assist persons with disabilities.

Lifting devices on public transit buses are equipped with the following safety features:

- A colour strip that runs its full width marking the bottom edge and that is high colour-contrasted with its background to assist with visual recognition

- A slip resistant platform surface

- Raised edges of sufficient height to prevent a mobility aid from rolling off the edge of the ramp during the boarding or debarking

- A visual warning lamp indicator and the audible warning alarm function when the kneeling function, ramp or lifting device is in motion

Steps on public transit buses are:

- Uniform is size and are marked by a colour strip that is high colour-contrasted with its background to assist with visual recognition, that runs the full width of the leading edge of the step, excluding any side edge mouldings, and can be viewed from both directions of travel

- The steps have surfaces that are slip resistant and that produce minimal glare

- The steps have uniform, closed riser heights and tread depths

Conventional Transit buses also have designated priority seating identified by decals that inform passengers that they are to vacate the seats should they be required by a person with a disability. The buses also have courtesy seating identified by decals that inform passengers that they are to vacate the seats should they be required by other customers who would benefit from being seated such as pregnant women, parents with children and seniors.

Note: Bus emergency procedures available.
